

This specification applies to our standard product. Everything is made to order so you are welcome to talk to us about any changes you would like.

Manufacturer

The Acorn Workshop, 21 Parkfield Avenue,
Bognor Regis PO213BW.
Tel: 07989 223 634
Email: sales@theacornworkshop.co.uk

Post

Iroko: 170mm x 45mm x 1.6m planed and finished with sanded edges, 45 degree angled top. The length of the post allows for up to 600mm in the ground.

Certification

All wood is PEFC™ certified.

Primadura Panel

Panel size A1 - 841mm x 594mm with 40mm return on all four sides. Printed aluminium panels with a 10 year guarantee. Graffiti, fire and UV resistance.

Fixings

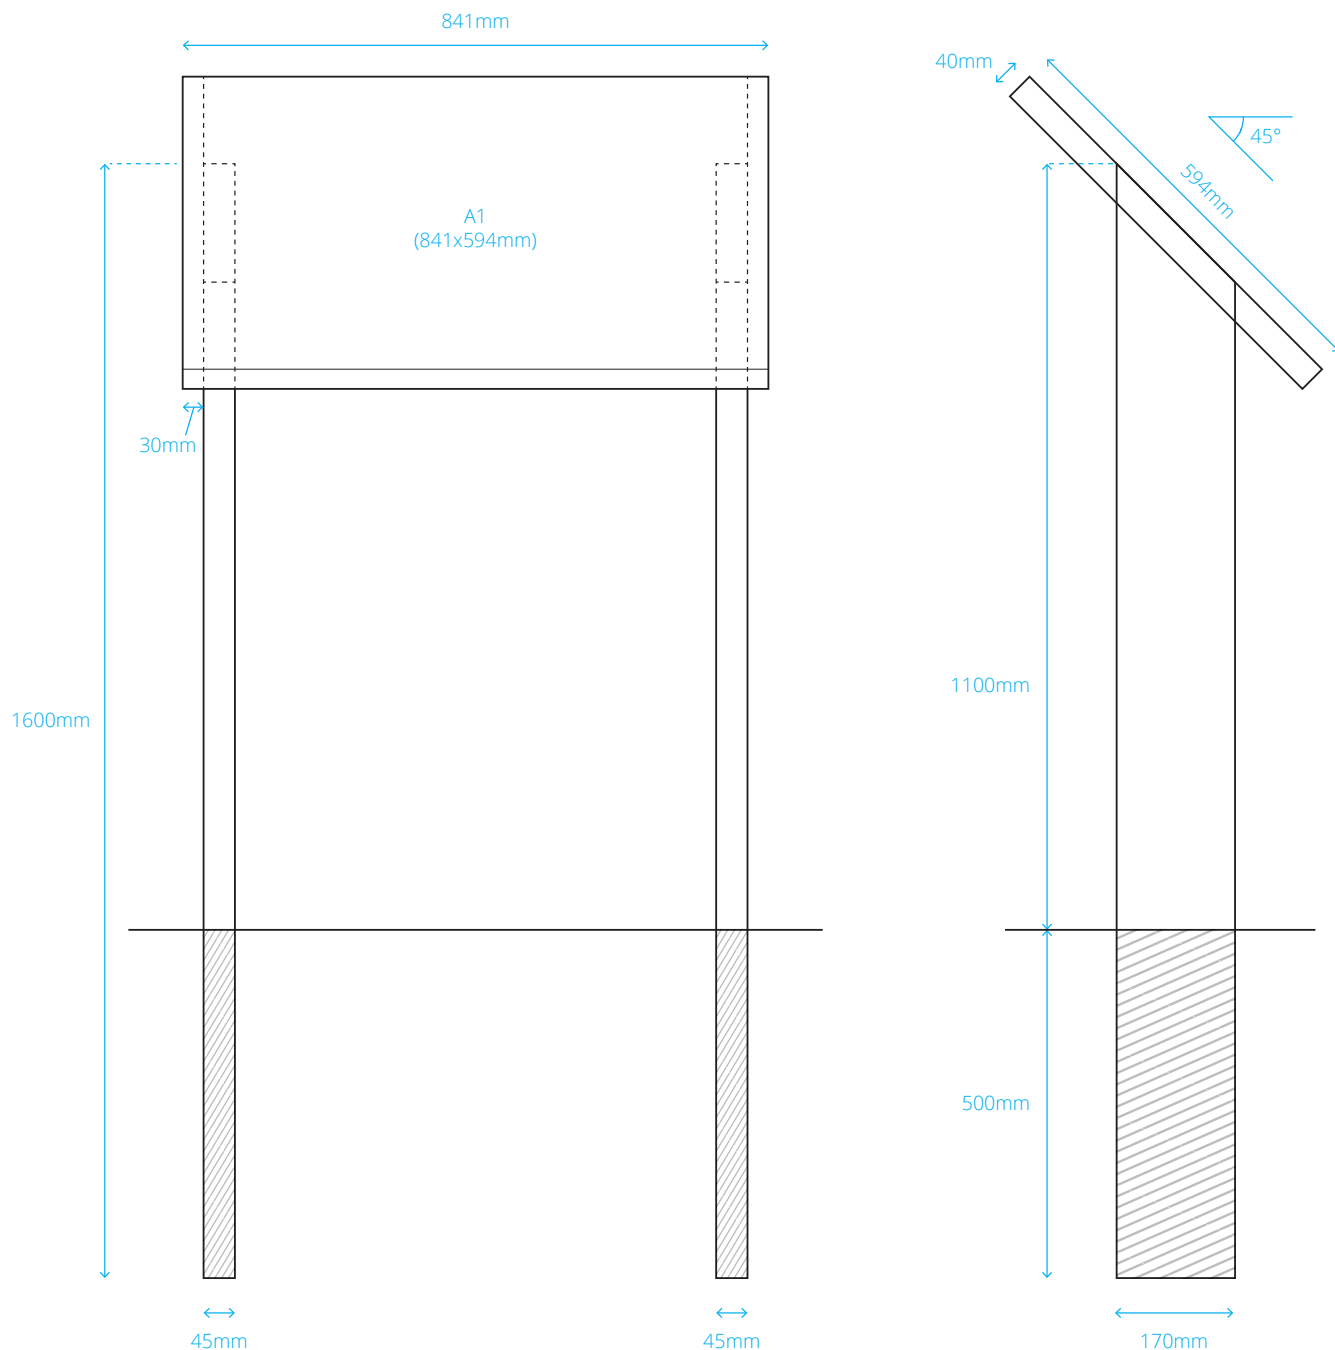

Angled oak wedges alongside the post support the top panel. Made from air dried oak, fixed in place with security screws on each side.

Notes

The PrimaDura panel should be regularly wiped with a damp cloth.

The diagram is for an A1 panel with frame. If you need a drawing for other sizes please contact us.

Scale 1:50

Design

This guide is for A1, please use the same principles for other sizes of contact us for further information.

These notes are just a guide. If you have any questions please speak to us for further guidance.

Artwork

Make up the artwork at the front face size, ie for A1 594mm x 841mm. The 40mm returns and back of the panel are finished with a near matching or contrasting RAL colour. We will confirm this with you before the panels are made.

For best quality reproduction use images at 200dpi / CMYK. The artwork must be provided as a press quality PDF with a 3mm bleed and printers marks. If you are supplying the artwork please sign it off with your designer, changes cannot be made once it has been sent to us and we cannot be held responsible for any errors in the artwork design or quality.

Design Service

We offer a competitive design service. Contact us for more information.

Your artwork can cover the whole of the panel.
For A1 594mm x 841mm.
Allow a 3mm bleed.

The returns should not be included in your artwork size.

Installation

1. Assemble the unit before digging your holes. The cross bar should sit flush to the short edge of the panel.
2. We recommend the post holes are dug to about 600mm.
3. Put the washer over the screw, then insert the screws into the pre-drilled holes on the side and tighten up. Snap the caps on top of the screws.
6. Position the posts into the pre-dug holes. Check the frame is upright and level. Fix in place with a product like Postcrete, or as appropriate for your area.

These notes are just a guide. If you have any questions please speak to us for further guidance.
